

FOR IMMEDIATE RELEASE

FG High End Appointed As CommandFusion Automation and Control Hardware Distributor in Chile

CommandFusion announce the immediate appointment of FG High End as the exclusive distributor of their automation and control hardware range covering the region of Chile.

Santiago, Chile — 31 July 2013

Chilean audio visual distributor FG High End have today been appointed as the exclusive distributors of CommandFusion hardware covering Chile in its entirety. This important step gives CommandFusion their first distribution presence on the continent of South America. FG High End have a wealth of knowledge in the audio visual industry in Chile, and the CommandFusion product line provides them the ability offer a full turnkey solution.

“South America is very important to us, a significant portion of our customers are located in that region. We are very excited to be working with the team at FG High End, with such a powerful product and a strong distributor we can continue to grow the popularity of CommandFusion” said Jarrod Bell, Co-Founder, CommandFusion.

With affordability and a modular, open framework at its core, the CommandFusion hardware range has been steadily growing in popularity. The hardware revolves around a modular design ensuring that all system sizes from a single room home automation system up to an entire campus' control system are cost effective.

CommandFusion believes in openness: software and hardware protocols are fully published - allowing integrators to mix control systems within a job to suit their requirements and budgets. This hardware line fits in well with FG High End's current products. With their team of support staff and programmers, they can offer local integrators the assistance they need to put together powerful automation and control systems. Already successful in the audio visual industry, FG High End will be looking to quickly gain ground in the local commercial and industrial automation and control sectors.

“CommandFusion offer a superior control product to others we have considered” said Francisco Garate, General Manager at FG High End. “The system is well designed, and extremely powerful. The pricing is spot on, with control hardware this cost effective, it will not be hard to sell this great hardware”

About CommandFusion

Founded in Melbourne, Australia in 2005 as GuiLink then renamed CommandFusion in 2011, the company has been selling its flagship software product (CommandFusion iViewer) for iOS since 2008. Renowned for its flexibility and versatility, iViewer is now available for both iOS and Android platforms. CommandFusion's control and automation hardware line was released in 2012, after a 3 years of development. With a small, dynamic and driven international team coming from the automation, software and hardware fields, CommandFusion strives to offer the best support and fastest innovation turnaround in the industry. CommandFusion continues to grow and adapt its software and hardware lineup to suit the constantly changing automation and control industries.
